The Digital Transformation of Motor Certification Issuance

---

DigiMi Paper, a cloud-based platform from Insursa, empowers the insurer transition safely from paper or sticker based certificates to digital motor insurance certificates, to enhance premium income, reduce premium leakage, reduce fraud and related costs associated with motor insurance certificate issuance process.

Managing a de-centralized, manual process of issuing paper-based motor insurance certificates is a cumbersome process for the insurance companies, authorities, and associations as it exposes them to risks such as

- ▶ Double insurance instances
- ▶ No provision to revoke a certificate for non-premium payment
- ▶ Fraudulent Insurance certificate
- ▶ Difficult to instantly validate insurance validity
- ▶ Lack of visibility of total number of motor vehicle with valid insurance certificates

Issuing digital motor insurance certificates benefits both the insurance companies and Insurance Association by addressing challenges relating to premium leakage and fraud. The DigiMi platform revolutionizes the entire motor insurance certificate issuance process, introducing speed, responsiveness, digital collaboration, anytime access, reliability, and security into certificate issuance and management.

## Key Benefits

**Prevent duplicate motor insurance issuance**

**Real-time access to certificate information**

**Effortless certificate validation by traffic authorities**

**Maximize premium income & prevent fraudulent practices**

# Platform Features

## Cloud-based Digital Platform

An easy-to-implement, highly secure platform integrated with insurers' core systems, traffic authorities, and insurance associations.

## Certificate Allocation

Insurance associations can allocate digital certificates to insurers, allowing auto-approval limits and internal allocation at multiple levels.

## Paperless Certificate Issuance

Minimize waiting times with digital certificate issuance, enabling insurers to efficiently provide certificates to insured parties.

## Real-time Certificate Access

Easy to access digital certificates anytime, anywhere for policyholders, insurers, traffic authority and regulatory bodies, streamlining validation and documentation processes.

## Real-time Validation on Insurance Coverage

Enable traffic authorities to validate certificate expiry and assess vehicle insurance coverage in real-time.

## Dynamic and Real-time Dashboards

Monitor registered insurers and valid certificates through real-time dashboard.

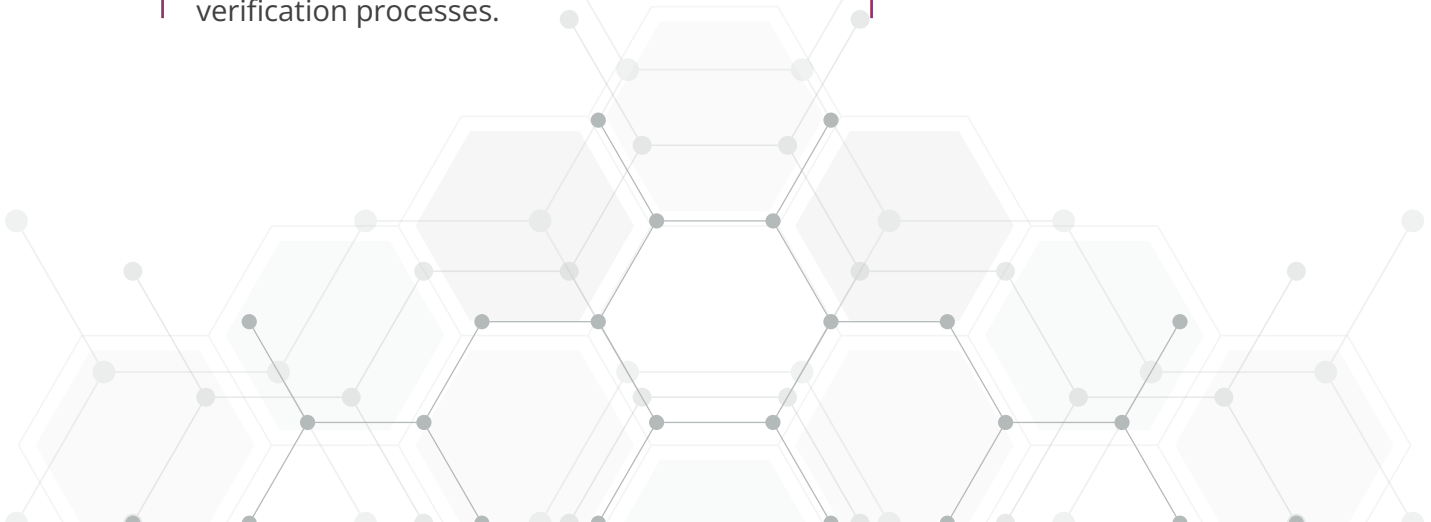

## Mobile App for Traffic Authority

Validate the authenticity of motor insurance certificates by scanning the QR code in the digital certificate, ensuring efficient verification processes.

## Certificate Revocation

Easily search and revoke lapsed certificates based on name, number, or premium status, maintaining data integrity.

Insursa, a US-based entity, leads innovation in insurance ecosystems with our flagship 5-Layer offering: Insursa Explore, Insursa OneLink, Insursa Connect, Insursa Engage and Insursa DigiBiz. These solutions are powered by Artificial Intelligence (AI) and Machine Learning (ML) technologies to have maximum impact and paradigm shift, propelling rapid digital transformations across the insurance industry.

## Empowering Tomorrow by Connecting the Dots
